

## **Pragma Systems Announces Pragma FortressSSH, TelnetServer and ClientSuite Now Released for HP Integrity Servers**

AUSTIN, Texas {July 25, 2008} – Pragma Systems, a leading provider of enterprise-class remote access and security software for Microsoft Windows and Windows Mobile, announces the release of [Pragma FortressSSH Server](#), [Pragma TelnetServer](#) and [Pragma ClientSuite](#) for HP Integrity servers with Intel Itanium processors running Windows Server.

Now enterprise customers using mission-critical HP Integrity servers will be able to run Pragma's high-performance Fortress SSH, [SFTP](#) and Telnet servers to provide secure remote access, secure file transfer and telnet management access.

"As requested by our customers, Pragma's patent-pending Advanced Console architecture support is now available on HP Integrity servers built with the Intel Itanium processor," says David Kulwin, CTO and co-founder of Pragma Systems. "We are pleased to offer our Fortune 500 customers the industry's first SSH server, SFTP server and Telnet server for HP Integrity servers."

Pragma's products allow end-to-end secure remote access and management on computers across an enterprise environment. Customers now have a reliable way to utilize secure system administration, application delivery and secure encrypted file transfer throughout computing environments with Pragma's product suite, which spans Windows-based servers and desktops and Windows Mobile-based platforms. Pragma is an HP Integrity Ready Partner and originally developed and tested this version of the software on HP Integrity servers. Pragma FortressSSH Server, FortressSSH ClientSuite and TelnetServer products are now available in native Itanium platforms running Windows Server 2008, Windows Server 2003 Enterprise and Datacenter Editions.

"Customers with demanding workloads in today's datacenters look to HP Integrity servers running Windows to provide a highly reliable and scalable platform in order to mitigate risk to their business," said Brian Cox, director, software planning and marketing, Business Critical Systems, HP. "By incorporating Telnet and SSH connectivity from Pragma Systems with the HP Integrity platform, enterprises can benefit from a truly secure, mission-critical environment."

### **About Pragma Systems Inc.**

Pragma Systems Inc. is a leading provider of enterprise-class remote access and security software for Microsoft Windows and Windows Mobile platforms. Pragma is an industry leader in Secure Shell and Telnet technology and offers the most popular SSH and Telnet servers for Windows, as well as industrial-grade SSH clients for handhelds via Pragma PocketVT. The company's end-to-end solutions of servers and clients on the desktop and mobile devices provide highly secure access to corporate supply chain, CRM, distribution and warehouse applications over wireless, Bluetooth, LAN, WAN and mobile networks. Pragma's software is deployed in the majority of Fortune 500 companies in the USA and over 2200 companies worldwide, with millions of licensed nodes in over 65 countries.
